

IN THE CLAIMS:

Subcl 1

A1

1. An apparatus for collecting, disposing, and measuring liquids, comprising:
a vessel including side walls and a bottom wall forming an inner surface;
and
absorption means disposed on entire said inner surface substantially
covering said side walls and said bottom wall of said vessel for absorbing
and collecting liquids within said vessel.

Sub E1
A2

7. The apparatus according to claim 6, wherein said absorption means
further includes super-absorbing means centrally located on said inner surface of said
vessel for absorbing, collecting, and retaining liquids including urine, water, liquid fecal
material, body fluids, and vomit.

A3

11. Absorption means disposed on entire inner surface of a vessel including
side walls and a bottom wall for collecting liquids within the vessel, wherein said
absorption means substantially covers the side walls and the bottom wall.

A4

21. Absorption means for absorbing liquids including connecting means for
connecting said absorption means to an inner surface of a vessel including side walls
and a bottom wall wherein said absorption means covers the entire inner surface
thereon substantially covering the side walls and the bottom walls.

Subcl 22

22. A disposable vessel including an inner chamber having side walls and a
bottom wall and absorption means disposed on entire said inner chamber substantially
covering said side walls and said bottom wall for absorbing liquids.
